

Resumé: David Berube

Who is David Berube?

David Berube is a self employed software developer, writer and speaker. He develops software in number of languages for a wide variety of clients – from tech startups to Ivy League colleges.

He possesses a wide variety of skills. Often, he acts as a **Web Application Developer**, creating applications in such languages as **Ruby on Rails** and **PHP**. As a writer, he's written articles on both Ruby and PHP for major magazines such as Dr Dobb's Journal, Linux Magazine, and PHP International Magazine. Those articles have been available in **over sixty countries**.

Work Experience

From 2000 to present, he's been running **Berube Consulting**, a one person web application development and consulting firm. His responsibilities include marketing, sales, project management, and software development.

Education

As a child, he was schooled at home, where he excelled. By the age of six, he had a college grade reading level. Then, he attended **New Hampshire Technical Institute** at the age where most children enter high school. Additionally, he received over eight years of education at the **Kingdom Ministry School of Jehovah's Witnesses**, and attended the **2004 Pioneer Service School of Jehovah's Witnesses**.

Portfolio Excerpts

Argo Cycles

<http://ArgoCycles.com>

Argo Cycles is a large salvage motorcycle and automobile dealer – they currently have more than sixty hundred vehicles on the lot. David developed the software that runs Argo Cycles business, from when they first bid on a vehicle, to when the vehicle is brought into the shop and photographed, to the onsite sales pitch, to the website, and to the final sale. A combination of **MySQL/PHP** website and **PostgreSQL/VB6** inventory management lets Argo sell their bikes and cars quickly and efficiently.

BirdfluBreakingNews.com

<http://BirdfluBreakingNews.com>

BirdFluBreakingNews covers all of the breaking news for Bird Flu (H5N1), a current health issue. It cuts through the clutter, deliver focused, up-to-the-minute updates on Bird Flu all over the world, from new to user discussions to E.U. and U.N. documents and maps. BirdFluBreakingNews runs on **MySQL/Joomla/PHP with a Ruby backend** delivering data from a combination of RSS and custom data sources.

Online Dealership Networking

<http://Online-Dealership-Network.com/>

Online Dealership Network provides websites for auto dealers. Berube provided advanced technical services, programming features that other developers couldn't provide: **PHP/MySQL** vendor integration takes dealership inventory and provides it to advertising networks, streamlining **sales and lead generation**.

Databases & Dynamic Ruby Classes

Dr Dobb's Journal, December 2004

Ruby On Rails is a powerful new web framework being deployed worldwide. Ruby On Rails includes extensive dynamic Ruby database classes, which is what this article deals with. The intersection of Ruby's class and database support is dealt with in this article, which was found in newsstands everywhere, such as Borders, WaldenBooks, Barnes and Nobles, and more.

The Impact Group

David developed a powerful **Customer Relationship Management** tool for The Impact Group, enabling them to coordinate a nationwide network of sales personnel, telemarketing, and technical support staff.

Testimonials

"I recently had the **pleasure of hearing David Berube speak** to a group of technologists on the topic of "Making Money Using Open Source Software". His presentation was both informative and entertaining. As an experienced entrepreneur and Free Software advocate, I know that **his insights were on the mark.**"

— Greg Rundlett
Proprietor
FREePHILE

"[David] offered some **really great advice**... I came away from the presentation with some very good ideas that I intend to put into use."

— Scott A. Garman
University of New Hampshire
Nuclear Physics Group
